VATSAL SRIVASTAVA

www.linkedin.com/in/vatsal-srivastava-440417260

Professional Summary

Data Analyst with strong proficiency in Python, SQL, and visualization tools like Tableau and Power BI. Demonstrated ability to analyze large datasets, derive actionable insights, and communicate findings effectively through hands-on projects.

Skills

Technical skills

Programming & Databases: Python (Pandas, NumPy, Matplotlib, Seaborn, Data Cleaning & ETL), SQL (MySQL, SQLite, Statistical Analysis)

BI & Visualization Tools: Power BI, Tableau, Plotly

Technical Tools: Jupyter Notebook, Excel, Git/GitHub, A/B Testing

Soft Skills: • Data Storytelling, Stakeholder Communication, Problem-Solving, Team Collaboration.

Projects

Root Cause Analysis: User Engagement Collapse Investigation | Python, Statistics, A/B Testing

- Conducted root-cause analysis on 17% watch time drop post-Model v4.2 deployment, using advanced PostgreSQL queries and Python ETL on clickstream logs.
- Isolated regional failure in IN-North and IN-South via segmented time-series analysis, hypothesis testing, and bounce rate spikes—ruling out global factors and confirming poor recommendation quality.
- Quantified 7-day business impact (lost video plays) and recommended prioritized actions: immediate rollback plus canary testing for future deployments.

Predictive Analytics: Aadhaar Framework Analysis (Prophet, K-means, Forecasting)

- Built a Composite Risk Index for district-level Aadhaar data staleness using enrolment/update aggregation, identifying higher risk in Aspirational Districts (score: 0.7904 vs. average 0.7819).
- Applied K-means clustering to segment districts into 4 archetypes (61% enrolments in priority high-risk groups) and Prophet time-series forecasting to predict rising update demand/backlogs.
- Created interactive Plotly choropleth maps and dashboards, validating negative correlation with financial inclusion and recommending targeted mobile camps for proactive maintenance.

E-Commerce Customer Behavior and Sales Insights Dashboard

- Developed an interactive Power BI dashboard using Power Query for data transformation and DAX, analyzing 4,373 customers across 38 countries and visualizing £9.75M in total sales.
- Uncovered key insights including seasonal peaks in November (Q4 dominance), top revenue generators and customer behavior patterns, such as UK market volume leadership contrasted with higher average order values in Netherlands and Australia.
- Enabled strategic business decisions through slicers, cross-filtering, and pages for Sales Overview and Customer Purchasing Analysis, informing targeted promotions, inventory adjustments, and market expansion opportunities.

CERTIFICATIONS

Google Data Analytics Professional Certificate Issued by **Google**

[Data Science Course Issued by GeeksforGeeks](#)

Education

BACHELOR OF SCIENCE | INDIRA GANDHI NATIONAL OPEN UNIVERSITY (IGNOU) EXPECTED GRADUATION: 2026
